

Fire Flow Study Process

To begin the Feasibility Study process to obtain a Fire Hydrant and or Fire Suppression Line *only*, please submit the minutes of the pre-construction meeting from the applicable county to CCSUD. The applicants project engineer (TBPE required) will need to fill out the Feasibility Study Service Application (FSSA) and provide a site map of the service address and include the county property ID# of the proposed location. CCSUD does not accept incomplete submissions. Any design questions, water availability, etc. are all determined through the feasibility study process. Any meetings requested for design questions, water availability, etc. will be scheduled *after* the feasibility study has been completed. For security reasons, we do not give out the location of our waterlines and/or appurtenances.

Please email all documents to raelynn@crystalclearsud.org, CCSUD will then determine the cost of the study based upon what is requested on the FSSA and send back the fee amount. All payments are to be made payable to Crystal Clear SUD, in the form of a check, money order, or cashier’s check only. When dropping off or mailing in the payment, please be sure to provide the same proposed development name on the memo line that was provided on the FSSA. This is very important to ensure it gets posted to the correct project, not doing so can delay the study being sent to the engineer.

Non-Standard Service - Defined as any service request that requires a larger than 5/8” meter for service, temporary water service, service to a Master Metered Account or an addition to or extension of the district’s water system or wastewater system. Except for temporary service Applicants, a non-standard service Applicant must comply with the service requirements prescribed by Section F of these Rules and Regulations prior to receiving service.

Feasibility study fees are estimated, and additional fees may be necessary to complete the work. The first fee will cover the system capacity analysis, feasibility study and upfront efforts up to the execution of the NSSA. The second fee will cover review of plats, plans, submittals, and other construction phase efforts; please note, work on the project may cease until proper payment is received.

Each Feasibility Study has an additional \$50 admin fee that is not included in the price below. Standalone Fire Hydrant/Suppression studies have a \$70 flow fee that is not included in the price below.

Estimated time to complete the feasibility study is 60-90 days.

All Feasibility Studies will expire within 90 days upon return date.

For any further questions, please email raelynn@crystalclearsud.org.

Residential Developments (includes fire flow in the study)

Number of Proposed Lots	Fee
1 – 4	\$400 per lot (LUE)
5 – 10	\$2,000
11 – 50	\$3,000
51 – 100	\$4,000
101 – 250	\$5,000
251 – 500	\$6,000
501 – 1,000	\$8,000
1,001 – 2,000	\$10,000
2,001 – 3,000	\$15,000
Over 3,000	To Be Determined

Commercial Developments (fire flow not included in study)

LUE Count	Fee without Fire Flow	Fee with Fire Flow
Up to 2.5	\$1,000	\$3,000
2.6 to 7	\$2,000	\$4,000
8 to 34	\$3,000	\$5,000
35 to 64	\$4,000	\$6,000
65 to 139	\$5,000	\$7,000
140 to 240	\$6,000	\$8,000
Over 240	To Be Determined	To Be Determined
